

Posterior-family sensitivity on real RAD-seq marker tables

Cell labels give markers with posterior probability above 0.9 at depth 10

Literature dataset

T. tinca	7	7	7	11	40
P. altivelis	52	53	55	49	57
N. rossii	0	0	2	0	3
D. albolineatus	0	0	0	30	5403

Markers + 1
